Case Study on E-Commerce and Retail Product:
Buyniverse

Submitted by : Hrutuja Wankhede

Subject: BCVS(Business Communication Value Science)

1. Brief Explanation of the Activity

The BCVS subject-based activity was centered around the theme of E-Commerce and Retail Products. We created a mock brand titled 'BuyniVerse', representing an innovative online retail platform. The activity was designed to simulate real-time planning, teamwork, and product promotion under time constraints. We were given only 15 minutes to plan and execute the entire task, making time management the most essential aspect. The activity involved creating a visual collage on chart paper, showcasing our brand, its products, and marketing strategies.

2. Objective of the Activity

The primary objective of this activity was to:

- Understand the dynamics of team collaboration and leadership.

- Practice effective time management under pressure.

- Explore creativity in presenting e-commerce and retail ideas.

- Assign and fulfill roles efficiently to simulate a real-world task execution environment.

3. Planning and Preparation

Although the time provided was very limited, we quickly assigned roles within the group. As my role involved:

- Taking the leadership initiative.

- Assigning roles to each team member.

- Preparing the documentation with relevant slogans and titles.

- Ensuring everyone had clarity on their tasks.

- Coordinating and guiding the team in the collage-making process.

Each member prepared their part individually yet collaboratively within the given timeframe.

4. Implementation and Execution

- We began by deciding on our brand name – BuyniVerse.

- Every member took responsibility for a specific part – such as drawing, slogan writing, product detailing, etc.

- I guided and supported them while focusing on writing the catchy slogans, organizing the layout, and managing the overall presentation.

- The collage was crafted using colored papers, sketches, and keywords related to e-commerce, ensuring the design was both attractive and informative.

5. Outcome

- We successfully completed the activity within 15 minutes.

- The final collage presented the concept of Buyniverse effectively.

- Every member confidently played their part and supported the team.

- We experienced the power of organized teamwork and time-bound execution.

- I personally learned how to take initiative and guide a group under a time crunch while managing documentation efficiently.

6. Challenges Faced

- The main challenge was the extremely limited time frame.

- Despite this, every team member showed a strong sense of responsibility.

- Quick thinking and active participation from all ensured that we overcame the time constraint smoothly.

7. Personal Learning and Reflection

This activity gave me hands-on experience in:

- Leadership and coordination.

- Documentation and creative thinking.

- Effective communication and team management.

The experience also highlighted the importance of trust and synergy in a team for successful execution, even in high-pressure situations.
